# UI for Chronic Disease Monitoring AI Agent

This is the user interface of the **Chronic Disease Monitoring AI Agent**. It is designed to help users share their health details and get useful advice for managing diseases like **diabetes, high blood pressure, and heart problems**.

Key Features:

- **Chat-based Interaction**:
  The app uses an agent to talk with the user in a friendly way.

- **Health Info Collection**:
  The agent asks for important details like:
  - Age and gender
  - Weight and height
  - Type of disease (e.g., diabetes type 2)
  - Medicines being taken
  - Devices used (e.g., glucometer)
  - Recent health readings (like blood sugar)
- **Summary Response**:
  After the user gives their details, the AI shows a clear summary of their health info.

Why this UI is useful:

- Easy to use for all age groups
- Simple design with clear messages
- Helps users track their health regularly
- Can give personalized tips and reminders in the future
